## Quiz 7 Take-home

1. Find all eigenvalues of the following $3 \times 3$ matrix $A$. Then for each eigenvalue $\lambda$ find a basis for null $(\mathrm{A}-\lambda \mathrm{I})$. That is, find a basis for the eigenspace. (this is just a definition/terminology for what you are doing in the second step)

$$
A=\left[\begin{array}{ccc}
2 & 0 & -1 \\
0 & 2 & -1 \\
1 & 0 & 3
\end{array}\right]
$$
